4 REASONS WHY YOU SHOULD CHOOSE MCL SENIOR HIGH SCHOOL

TOP 5 SENIOR HIGH SCHOOL FAQS
Malayan Colleges Laguna (MCL) opened its doors to the youth of Southern Luzon on June 18, 2007. A wholly-owned subsidiary of the Mapúa Institute of Technology, MCL was founded to extend the quality of education Mapúa is known for.

Located in a scenic spot along the South Luzon Expressway in the city of Cabuyao, MCL is close to the industrial hub of Laguna, giving students easy access to on-the-job training opportunities in prestigious companies.

Five colleges and one institute have been established at MCL: the College of Arts and Science, the College of Computer and Information Science, the E.T. Yuchengco College of Business, the Mapúa Institute of Technology at Laguna, the Mapúa-PTC College of Maritime Education and Training, and the Institute for Excellence in Continuing Education and Lifelong Learning.

MCL prides itself in its consistent string of successes over the years which include 100% passing rates in several licensure or certification examinations, 15 topnotchers, and the exceptionally high employment rates of graduates – all of which have helped MCL secure its ranking as the number one private HEI (higher educational institution) in CALABARZON*.

The institution is set to grow even further with the addition of programs for Senior High School. To accommodate more students, MCL’s third building, named Albert Einstein, was completed this year.

With its excellent facilities, advanced IT-integrated curricula, and outcomes-based teaching and learning approaches, MCL envisions itself to be a center of excellence for science and technology education in Southern Luzon.

*Based on FindUniversity.ph Universities Ranking as of July 2015
MESSAGE FROM THE PRESIDENT

This is a time of change in Philippine education. In basic education K12 is being implemented and in higher education outcomes-based standards are being promulgated. Malayan Colleges Laguna (MCL) is actively involved in both reforms.

MCL is thus opening its doors to senior high school students come next school year. We shall offer all strands in the academic track and three strands in the technical-vocational track as you will read in the pages of this viewbook.

K12 is essential for the enhancement of the competencies of our country’s workforce. Those who intend to go to work right after high school can do so with knowledge, skills, values and attitudes that are up to 21st century requirements. Those who intend to go on to college shall be ready to tackle world-class curricula designed for global competitiveness. MCL is committed to make K12 work the way it is intended to.

Come study with us. We have highly-qualified faculty, learner-centered curricula and well-equipped laboratories. In the short span of eight years that MCL has been in this part of the country, it has established itself as a quality school that can compete at the highest levels nationally. By way of quantitative proof, it is unquestionably among the top schools in the whole country as far as passing rate in board examinations is concerned.

We aim to infuse our senior high school with the same quality that characterizes our college programs. Our senior high school could very well be not only your gateway to but also your in-house training ground for our vaunted tertiary level academic programs! If you are aiming for tech-voc programs, know that the intellectual and physical resources of our colleges squarely support such programs.

MCL is excited to be designing and implementing Grades 11 and 12 curricula and in the process break new ground in the education landscape. We hope you can join us in this journey!

Reynaldo B. Vea, Ph.D.
President
What is Senior High School?

Senior High School (SHS) covers the last two years of the K to 12 program and includes Grades 11 and 12. In SHS, students will go through a core curriculum and subjects under a track of their choice.

Will SHS mean two more years of High School?

Yes. These two additional years will equip learners with skills that will better prepare them for the future, whether it be:
• Employment
• Entrepreneurship
• Skills Development (Further Tech-Voc training)
• Higher Education (College)

Will the additional two years of High School mean additional expenses?

Not necessarily.
• Senior High School “completes” basic education by making sure that the high school graduate is equipped for work, entrepreneurship, or higher education. This is a step up from the 10-year cycle where high school graduates still need further education (and expenses) to be ready for the world.
• SHS will be offered free in public schools and there will be a voucher program in place for public junior high school completers as well as ESC beneficiaries of private high schools should they choose to take SHS in private institutions.
• This means that the burden of expenses for the additional two years need not be completely shouldered by parents.

How will SHS affect my college education?

SHS, as part of the K to 12 Basic Curriculum, was developed in line with the curriculum of the Commission of Higher Education (CHED) – the governing body for college and university education in the Philippines.

This ensures that by the time you graduate from Senior High School, you will have the standard knowledge, skills, and competencies needed to go to college.

How will students choose their Senior High School specializations?

Students will undergo assessments to determine their strengths and interests. These will include an aptitude test, a career assessment exam, and an occupational interest inventory for high schools. Career advocacy activities will also be conducted to help guide students in choosing their specialization or track.

With the incorporation of smart classrooms, interactive whiteboards, an effective Learning Management System and campus-wide wireless connectivity to high speed internet, students will have everything they need for technology-assisted learning.

SMART CAMPUS

4 REASONS WHY YOU SHOULD CHOOSE MCL SENIOR HIGH SCHOOL
4 REASONS WHY YOU SHOULD CHOOSE MCL SENIOR HIGH SCHOOL

LEARNER-CENTERED CURRICULA

Benchmarked against international standards, the MCL Senior High School curriculum was developed to carry on the brand of outcomes-based education (OBE) that MCL has become known for by producing graduates who are fully prepared to enter college, seek employment, or start their own businesses. All tracks will follow the same end goal: to equip students with the knowledge, skills, and values necessary for college and career successes in the 21st century.
There can be no question of competence when it comes to MCL's faculty, which is comprised of academicians and industry practitioners with impressive educational backgrounds. These experienced professors will go on to share their expertise with the new breed of students entering MCL's Senior High School, ensuring quality training for each student’s chosen specialization.
INDUSTRY-PREFERRED PROGRAMS

MCL has carved a name for itself with topnotch programs that have produced excellent board passing and employment rates. The same tradition of excellence will be carried on at MCL Senior High School as the institution forges more industry partnerships that will give students the real-world exposure they need.
Decided on pursuing a college education after Senior High School? Choose from all four strands under the Academic Track, right here at MCL.
Science, Technology, Engineering and Mathematics (STEM)

STEM is the strand for students who wish to explore the natural world and other technical subjects: future scientists, I.T. experts, engineers, mathematicians, health scientists, architects, maritime professionals, and agriculturists, among others. Specialized subjects for the strand include Calculus, Biology, Physics and Chemistry.

Accountancy, Business and Management (ABM)

Humanities and Social Sciences (HUMSS)

The HUMSS strand is for students interested in human individuals and societies: future psychologists, social and political scientists, communicators, multimedia professionals, journalists and social workers. Specialized subjects include Creative Writing; Creative Non-fiction; Introduction to World Religions and Belief Systems; Trends, Networks and Critical Thinking in the 21st Century; Philippine Politics and Governance; Community Engagement, Solidarity and Citizenship; and Disciplines and Ideas in the Social Sciences.

General Academic (GA)

Senior High School students who will take the GA strand can choose two humanities subjects, one social science subject and two electives from the specializations offered. Other subjects include Applied Economics, Organizational Management, and Disaster Risk Reduction Management.
Is employment after Senior High School graduation your top priority? Consider the variety of strands and specializations available at MCL.

Information and Communications Technology (ICT)

ICT is for the I.T.-inclined. After graduation, students can either work or, depending on the specialization, continue to college with courses like Computer Science, Information Technology, Digital Arts and Design, Communication – Multimedia Arts, or Broadcasting.

Specializations:
- Animation and Computer Programming
- Contact Centre Services

Industrial Arts (IA)

IA subjects involve the acquisition of skills using tools and machines. Students will also have the option to take college courses such as Mechanical Engineering, Electronics Engineering, or Electrical Engineering, or apply for work right after graduation.

Specializations:
- Consumer Electronics Servicing
- Shielded Metal Arc Welding

Home Economics (HE)

HE is the recommended strand for those who are interested in college degrees such as Culinary Arts and Hotel and Restaurant Management. Students will have the option to continue their studies or seek employment after graduating.

Specialization:
- Bread and Pastry Production, Cookery, Food and Beverage Services and Housekeeping
